A way to send data between threads

MPSC - multiple producer single receiver

Channels

A way to send data between threads

MPSC - multiple producer single receiver

Create a channel

```
use std::sync::mpsc;
let (tx, rx) = mpsc::channel();
```

Channels

A way to send data between threads

MPSC - multiple producer single receiver

Create a channel

```
use std::sync::mpsc;
let (tx, rx) = mpsc::channel();
```

Send a message

```
tx.send()
```

Channels

Receive a message

```
rx.recv()                 // blocking
```

```
rx.try_recv()    // non blocking
```
